Index of Authors

Numerals followed by the letter A refer to Abstracts of Communications read at Meetings for Original Communications of The Nutrition Society

Agyemang, K. see *Little, D. A.* 210A

Ahmed, Faruk, Jones, David B. & Jackson, Alan A. The interaction of vitamin A deficiency and rotavirus infection 67A

Al-Arabi, A. & Andrews, J. F. Histological changes in brown adipose tissue associated with weight loss in obese Zucker rats resulting from the combined administration of neuropeptide Y and noradrenaline 102A

Albers, Sabine see *Fürst, Peter* 343–359

Allen, Ros see *Blake, David R.* 239–245

Anantharaman, K. see *Anantharaman-Barr, H. Gillian* 223A

Anantharaman, K. see *McCracken, K. J.* 213A

Anantharaman-Barr, H. Gillian, Decombaz, J., Decarli, B. & Anantharaman, K. The effect of the oestrous cycle in rats on carbohydrate consumption 223A

Anantharaman-Barr, H. Gillian, Pollet, Patricia E. & Bartholdi, Isabelle Energy intake and basal metabolic rate in lean and overweight women during the menstrual cycle 224A

Anderson, Annie S. & Shepherd, R. Beliefs and attitudes toward healthier eating among women attending a maternity hospital 65A

Andrews, J. F. see *Al-Arabi, A.* 102A

Andrews, J. F. see *Buckley, Niamh* 103A

Annan, Douglas S., Challis, Brian C., Harrison, John D., Iley, Jim, Morris, David L. & Shears, Gillian E. Nitrosation of amino acids and peptides in gastric contents 33A

Armar-Klemesu, Margaret A. & Wheeler, Erica F. Activity and energy expenditure of lactating women in rural Ghana 45A

Armstrong, E. F., Eastwood, M. A. & Brydon, W. G. The effect of interactions of soluble (pectin) and insoluble (wheat bran) dietary fibres on caecal short-chain fatty acids and caecal tissue weight in the rat 231A

Arnold, J., Shipley, K. A., Scott, N. A., Little, R. A. & Irving, M. H. Metabolic effects of lipid infusion in septic and non-septic humans 170A

Arthur, J. R., Nicol, F., Rae, P. W. H. & Beckett, G. J. Selenium depletion and repletion: effects on the thyroid gland in the rat 32A

Atkinson, T. see *MacRae, J. C.* 155A

Badji, B. see *Little, D. A.* 210A

Ballmer, P. E., McNurlan, M. A., Southorn, B. G., Grant, I. & Garlick, P. J. The effect of human interleukin-1β on rat liver protein synthesis compared with a systemic inflammatory insult induced by turpentine 162A

Barclay, G., Brady, K., Richards, J. R. & Pennington, G. R. Prevention and management of venous thrombosis complicating central parenteral nutrition: a clinical audit 204A

Bardocz, S. see *Pusztai, A.* 144A

Barker, M. E. see *Strain, J. J.* 23A

Barker, Margo E. see *Strain, J. J.* 289–296

Barlow, S. M., Young, F. V. K. & Duthie, I. F. Nutritional recommendations for *n*-3 polyunsaturated fatty acids and the challenge to the food industry 13–21

Bartholdi, Isabelle see *Anantharaman-Barr, H. Gillian* 224A

Barua, J. M., Scrimgeour, C. M., Mackay, I. M. & Rennie, M. J. The time dependence of nitrous oxide interference in ^{13}C and ^{18}O isotope ratio measurements in breath and plasma after inhalation by mask 201A

Bates, C. J. & Tsuchiya, Harumi Zinc in breast milk: a fractionation study, and comparison between communities 149A

Beckers, J. F. see *Istasse, L.* 147A

Beckett, G. J. see *Arthur, J. R.* 32A

Beever, D. E. see *Walsh, A.* 153A

Bégin, Michel E. Fatty acids, lipid peroxidation and diseases 261–267

Bell, M. see *Murray, A. E.* 184A

Bennet, William M., Connacher, Alan A., Scrimgeour, Charles M., Jung, Roland T. & Rennie, Michael J. [^{15}N]phenylalanine and L-[1-^{13}C]leucine leg exchange and plasma kinetics during amino acid infusion and euglycaemic hyperinsulinaemia: evidence for stimulation of muscle and whole-body protein synthesis in man by insulin 179A

Beringer, T. R. O. see *Eaton-Evans, Jill* 92A

Bibby, D. & Grimble, R. F. Coconut oil feeding suppresses hypothalamic prostaglandin E_2 production in response to tumour necrosis factor α and endotoxin 164A

Bienfait, J. M. see *de Haan, V.* 146A

Bienfait, J. M. see *Istasse, L.* 147A

Bingham, Sheila A. Mechanisms and experimental and epidemiological evidence relating dietary fibre (non-starch polysaccharides) and starch to protection against large bowel cancer 153–171

Bladon, P. see *Schorah, C. J.* 87A

Blair, P., Lavery, G. G., Smillie, J. D., McLeod, H. N., Clarke, R. S. J. & Rowlands, B. J. Energy expenditure in the severely traumatized patient: early experience 186A

Blake, David R., Merry, Peter, Stevens, Cliff, Dabbagh, Alya, Sahinoglu, Tulin, Allen, Ros & Morris, Chris Iron free radicals and arthritis 239–245

Blessing, K. see *Heys, S. D.* 36A

Blessing, K. see *Park, K. G. M.* 168A

Bojang, M. see *Little, D. A.* 209A

Bolton-Smith, C., Smith, W. C. S., Woodward, M. & Tunstall-Pedoe, H. Age trends in nutrient intakes for non-manual and manual occupational groups: the Scottish Heart Health Study 63A

Bolton-Smith, C., Smith, W. C. S., Woodward, M., Brown, C. A. & Tunstall-Pedoe, H. Dietary differences between social class groups in the Scottish Heart Health Study 62A
Bolton-Smith, C., Woodward, M., Smith, W. C. S. & Tunstall-Pedoe, H. Food knowledge and 'healthy' diets in people with and without coronary heart disease 225A
Bond, S. see *Wootton, S. A.* 15A
Bond, Sarah see *Murphy, Jane* 97A
Bone, J. M. see *Green, Ceri J.* 17A
Bonnemoy, F. see *Grenet, E.* 125A
Booth, Susan see *Cade, Janet* 66A
Borlak, N. J. see *Borlakoglu, J. T.* 34A
Borlakoglu, J. T., Borlak, N. J. & Dils, R. R. Human milk: a source of potentially toxic and carcinogenic halosubstituted biphenyls 34A
Boston, V. E. see *Hannon, R. J.* 200A
Brady, K. see *Barclay, G.* 204A
Braidman, Isobel P. Vitamin D and other extracellular factors in the control of growth 91–101
Brebner, J. see *Suttle, N.* 220A
Bremner, I. & Grimble, R. F. Influence of tumour necrosis factor α on blood cell and plasma metallothionein-I concentrations in rats 136A
Bremner, I. see *Morrison, J. N.* 68A
Brennan, M. M., Flynn, A. & Morrissey, P. A. Absorption of iron and zinc from human milk in suckling and weanling rats 70A
Brennan, M. M., Flynn, A. & Morrissey, P. A. Absorption of iron and zinc from soya- and cow's milk-based infant formulae in suckling rats 108A
Broom, J. see *Heys, S. D.* 165A
Brown, C. A. see *Bolton-Smith, C.* 62A
Brown, D. S. see *Pusztai, A.* 144A
Brown, J. C. W., Mazdai, G., Strain, J. J. & Hewitt, A. The effect of copper deficiency on plasma homocysteine in the rat 106A
Brown, J. C. W. see *Mazdai, G.* 107A

Index of Subjects

Numerals followed by the letter A refer to Abstracts of Communications read at Meetings for Original Communications of The Nutrition Society

Acute phase proteins
C-reactive protein, sickness scores and energy expenditure in critical illness **49**, 184A, 1990
Reduced rates of hepatic protein synthesis, the acute phase protein response, and elevated circulating interleukin-6 and tumour necrosis factor in advanced malignancy **49**, 167A, 1990
Serum interleukin-6 and C-reactive protein response to elective surgery of varying magnitude **49**, 161A, 1990
Which cytokine modulates the acute phase response to elective surgery and accidental injury? **49**, 160A, 1990

Additives
Food fortification **49**, 39–50, 1990

Adipose tissue
Net substrate deposition in human adipose tissue in vivo after glucose ingestion and during insulin infusion **49**, 21A, 1990
Effects of growth hormone and nutrient interactions on ovine adipose tissue metabolism **49**, 153A, 1990

Adrenalectomy
Adrenalectomy reverses the impaired pyrogenic responses to interleukin-1β in obese Zucker rats **49**, 163A, 1990

β-Adrenergic agonist
Changes in protein metabolism of cultured muscle cells treated with cimaterol **49**, 137A, 1990
Reduction–oxidation state and protein turnover in rats treated with a non-selective β-agonist **49**, 140A, 1990
Response of sheep to cimaterol and white fishmeal supplementation of diets containing sub-maintenance levels of energy **49**, 138A, 1990
The effects of femoral arterial infusion of cimaterol on hind-limb metabolism in growing lambs **49**, 139A, 1990

Adrenergic agonists
Modification by clenbuterol of muscle atrophy induced by unilateral femur fracture plus protein–energy deficiency in the rat **49**, 190A, 1990

Advertising
What can and cannot be achieved by advertising **49**, 403–409, 1990

Albumin
Albumin and prealbumin as nutritional indicators **49**, 87A, 1990

Alcohol
Alcohol and cancer **49**, 145–151, 1990
Alcohol consumption and measurements of iron status **49**, 23A, 1990

Allergies
Use of a hypoallergenic casein hydrolysate diet in the rehabilitation of severely malnourished Gambian children with chronic diarrhoea **49**, 202A, 1990

Alzheimer's disease
Alzheimer's senile dementia: potential pathogenic significance of free radical and antioxidant micronutrient interactions **49**, 26A, 1990

Amino acid infusion
Urea production rates with two different amino acid solutions **49**, 203A, 1990

Amino acids
Amino acid needs and protein scoring patterns **49**, 489–497, 1990
Amino acids promote net phenylalanine balance and protein synthesis in legs of anaesthetized young pigs independently of insulin or glucagon **49**, 180A, 1990
Nitrosation of amino acids and peptides in gastric contents **49**, 33A, 1990

Anaemia
Iron deficiency anaemia in long-term institutionalized elderly women in Northern Ireland **49**, 92A, 1990

Anaerobic fungi
Observation of anaerobic fungi in the ruminant intestine **49**, 125A, 1990
Rusitec: a convenient device to study the digestive activity of anaerobic rumen fungi **49**, 126A, 1990
Wheat straw degradation, in Rusitec, in the presence or absence of rumen anaerobic fungi **49**, 127A, 1990

Anaesthetics
Effect of volatile anaesthetic agents on liver protein synthesis **49**, 182A, 1990

Antigliadin antibody
The use of antigliadin antibody assay in the assessment of dietary adherence in coeliac disease **49**, 98A, 1990

Anti-nutritional factors
Effects of long-term (2 year) feeding of rats on raw soya bean **49**, 143A, 1990

Antioxidants
A modified TRAP assay to measure pro-oxidant activity in serum **49**, 22A, 1990
Alzheimer's senile dementia: potential pathogenic significance of free radical and antioxidant micronutrient interactions **49**, 26A, 1990
Antioxidants and prooxidants in malnourished populations **49**, 247–259, 1990
Blood antioxidant status of runners in relation to training load **49**, 27A, 1990

Relation of plasma levels of antioxidants and cholesterol to the risk of colorectal cancer and polyps in Ireland **49**, 24A, 1990
Total peroxyl radical-trapping antioxidant potential of serum in myocardial infarction **49**, 109A, 1990

Arginine
Arginine in benign and malignant disease of the breast and colon **49**, 35A, 1990
The effect of arginine on the growth of experimental tumours **49**, 168A, 1990

Arm circumference
Arm circumference and energy balance in critical illness **49**, 17A, 1990

Arthritis
Iron free radicals and arthritis **49**, 239–245, 1990

Artificial sweeteners
Thermic effect of artificial sweeteners in humans: aspartame **49**, 19A, 1990

Ascorbic acid
Gastric juice ascorbic acid: effects of disease, hypochlorhydria and stimulation of gastric secretion **49**, 31A, 1990

Aspartame
Thermic effect of artificial sweeteners in humans: aspartame **49**, 19A, 1990

Aspirin
The effect of ephedrine and aspirin on the metabolic rate of lean and obese women **49**, 120A, 1990

Bacterial fermentation
Bacterial fermentation occurs in the terminal ileum of ileostomates **49**, 110A, 1990

Basal metabolic rate
Energy intake and basal metabolic rate in lean and overweight women during the menstrual cycle **49**, 224A, 1990

Body composition
Assessment of body composition by bioelectrical impedance compared with anthropometry, total body potassium and tritiated water dilution **49**, 195A, 1990
Assessment of body composition by segmental impedance measurements and specific resistivities **49**, 86A, 1990
Assessment of body composition: near infra-red interactance **49**, 197A, 1990
Body composition: the precision and accuracy of new methods and their suitability for longitudinal studies **49**, 423–436, 1990
Effect of energy restriction on the relationship between body fat and food intake in broilers **49**, 215A, 1990
Evaluation of simple predictive methods for assessing body composition: comparison with deuterated water technique **49**, 196A, 1990
Repeated periods of dieting by women using a very low energy diet. 2. Effect on body composition **49**, 12A, 1990

Bone fracture
Modification by clenbuterol of muscle atrophy induced by unilateral femur fracture plus protein–energy deficiency in the rat **49**, 190A, 1990

Bone growth
Regulation of long bone growth in vitro: effects of insulin-like growth factor-1 and growth hormone **49**, 151A, 1990

Bone mineral content
The bone mineral content of Gambian and Cambridge women **49**, 123A, 1990

Breast milk
Absorption of iron and zinc from human milk in suckling and weanling rats **49**, 70A, 1990
Breast-milk calcium and phosphorus concentrations of British and Gambian mothers during prolonged lactation **49**, 4A, 1990
Human milk: a source of potentially toxic and carcinogenic halosubstituted biphenyls **49**, 34A, 1990
Zinc in breast milk: a fractionation study, and comparison between communities **49**, 149A, 1990

Bromide space
The bromide space in endotoxaemia: a poor reflection of extracellular volume? **49**, 200A, 1990

Brown adipose tissue
Brown adipose tissue activity in children in relation to disease state **49**, 189A, 1990
Histological changes in brown adipose tissue associated with weight loss in obese Zucker rats resulting from the combined administration of neuropeptide Y and noradrenaline **49**, 102A, 1990
Insulin regulates the uncoupling protein content of brown adipose tissue **49**, 133A, 1990
Is brown adipose tissue present in the pig? **49**, 132A, 1990
Role of the sympathetic nervous system in the regulation by insulin of the level of uncoupling protein in brown adipose tissue **49**, 227A, 1990

Brush-border enzymes
Effect of lactation products on brush-border enzyme expression in sucking pigs **49**, 141A, 1990

Caecum
The effect of interactions of soluble (pectin) and insoluble (wheat bran) dietary fibres on caecal short-chain fatty acids and caecal tissue weight in the rat **49**, 231A, 1990

Calcium
Breast-milk calcium and phosphorus concentrations of British and Gambian mothers during prolonged lactation **49**, 4A, 1990
Calcium as an intracellular regulator **49**, 51–56, 1990
Dietary reduction increases secretion in rat distal colon induced by secretagogues acting via calcium but not cyclic AMP **49**, 178A, 1990

Intra- and extracellular calcium and hypertension **49**, 83–90, 1990
Intracellular calcium, cell injury and relationships to free radicals and fatty acid metabolism **49**, 77–81, 1990
Intracellular calcium ions and intramitochondrial Ca^{2+} in the regulation of energy metabolism in mammalian tissues **49**, 57–75, 1990
Vitamin D and other extracellular factors in the control of growth **49**, 91–101, 1990

Cancer
Alcohol and cancer **49**, 145–151, 1990
An overview of the epidemiological evidence linking diet and cancer **49**, 119–131, 1990
Arginine in benign and malignant disease of the breast and colon **49**, 35A, 1990
Chemical food contaminants in the initiation of cancer **49**, 133–144, 1990
Diet and cancer of the stomach, colon, rectum, breast and lung: a prospective cohort study **49**, 25A, 1990
Do rates of protein synthesis differ in separate biopsies from the same tumour? **49**, 36A, 1990
Inhibition of carcinogenesis by minor anutrient constituents of the diet **49**, 173–183, 1990
Lipogenesis measured in vivo in tumour-bearing rats **49**, 40A, 1990
Measurement of tissue protein synthesis in pathological conditions of the gastrointestinal tract in man **49**, 135A, 1990
Mechanisms and experimental and epidemiological evidence relating dietary fibre (non-starch polysaccharides) and starch to protection against large bowel cancer **49**, 153–171, 1990
Reduced rates of hepatic protein synthesis, the acute phase protein response, and elevated circulating interleukin-6 and tumour necrosis factor in advanced malignancy **49**, 167A, 1990
Relation of plasma levels of antioxidants and cholesterol to the risk of colorectal cancer and polyps in Ireland **49**, 24A, 1990
The association between diet and colorectal polyps and cancer in an Irish population **49**, 91A, 1990
The relationship between leucocyte and muscle zinc in surgical patients with and without gastrointestinal cancer **49**, 72A, 1990

Carbon-13 enrichment
Background variations in breath carbon-13 enrichment in free-living infants and toddlers **49**, 5A, 1990

Carbon dioxide production
The recovery of labelled carbon dioxide during a 36 h continuous infusion of bicarbonate in man **49**, 198A, 1990

Carnitine deficiency
Systemic carnitine deficiency: an animal model produced by haemodialysis of sheep **49**, 148A, 1990

Carotenoids
Blood carotenoid profiles in Irish population groups **49**, 89A, 1990

Cartilage
Investigation of the effects of insulin-like growth factor-1 and age on cartilage growth using *in situ* biochemical techniques **49**, 152A, 1990

Catch-up growth
Protein requirements for catch-up growth **49**, 507–516, 1990

Cell lineage
Cell lineage and differentiation during growth of the early mammalian embryo **49**, 269–279, 1990

Cell proliferation
Effect of the intestinal microflora and dietary fibre on colonic epithelial cell proliferation **49**, 37A, 1990
Oats, gastrointestinal cell proliferation and serum cholesterol in the rat **49**, 39A, 1990
Stimulation of large bowel fermentation has no effects on duodenal epithelial proliferation in rats given white bread-based diets **49**, 38A, 1990

Cholecystokinin
Cholecystokinin effects on wet and dry meals in pigs **49**, 222A, 1990

Cholesterol
Hypocholesterolaemic and other responses to oat bran intake in humans **49**, 50A, 1990
Oats, gastrointestinal cell proliferation and serum cholesterol in the rat **49**, 39A, 1990
Relation of plasma levels of antioxidants and cholesterol to the risk of colorectal cancer and polyps in Ireland **49**, 24A, 1990

Cigarette smoking
Comparison of the diets of smokers and non-smokers **49**, 42A, 1990
Smoking and diet: is the diet of smokers different? **49**, 41A, 1990

Cimaterol
Changes in protein metabolism of cultured muscle cells treated with cimaterol **49**, 137A, 1990
Response of sheep to cimaterol and white fishmeal supplementation of diets containing sub-maintenance levels of energy **49**, 138A, 1990
The effects of femoral arterial infusion of cimaterol on hind-limb metabolism in growing lambs **49**, 139A, 1990

Clenbuterol
Modification by clenbuterol of muscle atrophy induced by unilateral femur fracture plus protein–energy deficiency in the rat **49**, 190A, 1990

Clinical nutrition
Dipeptides in clinical nutrition **49**, 343–359, 1990
Ketone bodies as substrates **49**, 361–373, 1990
New developments in fat emulsions **49**, 375–380, 1990
Novel substrates and nutritional support: possible role of ornithine α-ketoglutarate **49**, 381–387, 1990

Cobalt deficiency
Plasma methylmalonate and urocanate as indicators of defects in vitamin B_{12}-dependent metabolism in cobalt-deficient sheep **49**, 150A, 1990

Coconut oil
Coconut oil feeding suppresses hypothalamic prostaglandin E_2 production in response to tumour necrosis factor α and endotoxin **49**, 164A, 1990

Coeliac disease
The use of antigliadin antibody assay in the assessment of dietary adherence in coeliac disease **49**, 98A, 1990

Colon
Dietary reduction increases secretion in rat distal colon induced by secretagogues acting via calcium but not cyclic AMP **49**, 178A, 1990
The movement of intact urea across the mucosa of the defunctioned human colon **49**, 49A, 1990

Colon function
Comparative studies of the defunctioned and functioning colon in patients with a defunctioning colostomy confirm human colonic permeability to urea **49**, 177A, 1990

Colonic bacteria
Fermentation of wheat bran or sugar-beet fibre by human colonic bacteria growing in vitro in semi-continuous culture **49**, 124A, 1990

Complex carbohydrates
Effect of raw peas on activities of key enzymes of lipid and carbohydrate metabolism in rat liver **49**, 52A, 1990
Large bowel fermentation in rats given raw peas in the diet **49**, 51A, 1990

Computerized food tables
Comparison of computerized nutrient calculations and analysed values for water, protein, fat, calcium, iron, sodium and potassium in cooked dishes eaten in Ireland **49**, 90A, 1990

Copper deficiency
No diminution of complement activity or oxidative respiratory burst capacity with copper deficiency in the rat immune system **49**, 107A, 1990
The effect of copper deficiency on plasma homocysteine in the rat **49**, 106A, 1990

Coronary heart disease
Food knowledge and 'healthy' diets in people with and without coronary heart disease **49**, 225A, 1990

Corticosteroid therapy
Effects of corticosteroid therapy on quadriceps protein synthesis and intramuscular prostaglandin concentration in patients with rheumatoid arthritis **49**, 169A, 1990

Corticosterone
Elevated corticosterone-sensitive enzyme activities in obese Zucker rat brain **49**, 80A, 1990
The effect of fasting on plasma corticosterone kinetics in the anaesthetized rat **49**, 79A, 1990
The effects of gonadectomy on weight gain and corticosterone metabolism in rats **49**, 7A, 1990

Creatine dilution
A comparison of skeletal muscle mass in rabbits as measured by dissection and by creatine dilution **49**, 81A, 1990

Critical illness
C-reactive protein, sickness scores and energy expenditure in critical illness **49**, 184A, 1990

Cystic fibrosis
Dietary supplementation in undernourished children with cystic fibrosis **49**, 95A, 1990
Macronutrient intake and digestibility in eighteen cystic fibrosis patients **49**, 96A, 1990
Resting energy expenditure in cystic fibrosis **49**, 15A, 1990

Cytokines
Reduced rates of hepatic protein synthesis, the acute phase protein response, and elevated circulating interleukin-6 and tumour necrosis factor in advanced malignancy **49**, 167A, 1990
Which cytokine modulates the acute phase response to elective surgery and accidental injury? **49**, 160A, 1990

Deuterated water dilution
Evaluation of simple predictive methods for assessing body composition: comparison with deuterated water technique **49**, 196A, 1990

Diarrhoea
Use of a hypoallergenic casein hydrolysate diet in the rehabilitation of severely malnourished Gambian children with chronic diarrhoea **49**, 202A, 1990

Diet and cancer
Alcohol and cancer **49**, 145–151, 1990
An overview of the epidemiological evidence linking diet and cancer **49**, 119–131, 1990
Chemical food contaminants in the initiation of cancer **49**, 133–144, 1990
Inhibition of carcinogenesis by minor anutrient constituents of the diet **49**, 173–183, 1990
Mechanisms and experimental and epidemiological evidence relating dietary fibre (non-starch polysaccharides) and starch to protection against large bowel cancer **49**, 153–171, 1990

Diet selection
The ability of broiler chickens to regulate protein intake when offered a choice of diets containing different levels of protein **49**, 218A, 1990
The influences of meal composition on subsequent food selection in broiler and layer chickens **49**, 219A, 1990

Dietary energy
Dietary energy intake and faecal energy excretion in normal healthy children **49**, 97A, 1990

Dietary fat
Effect of different dietary supplemental fats and oils on growth performance and fatty acid composition of tissues in female broilers **49**, 130A, 1990

Sex, age and social class differences in attitudes towards consumption of high-fat foods **49**, 64A, 1990

Dietary fibre

An evaluation of a high-fibre diet in the dietetic treatment of patients on regular haemodialysis **49**, 94A, 1990

Diet and plasma lipids in a group of vegetarians and omnivores **49**, 59A, 1990

Differential response in rat gut hypertrophy to inclusion of guar gum and volatile fatty acid salts in the diet **49**, 211A, 1990

Effect of the intestinal microflora and dietary fibre on colonic epithelial cell proliferation **49**, 37A, 1990

Effect of two types of guar gum in solid and liquid foods on postprandial blood glucose, plasma insulin and C-peptide in healthy subjects **49**, 54A, 1990

Effects of cellulose, pectin and guar gum on gastric emptying, digestibility and absorption in resting dogs **49**, 146A, 1990

Effects of cellulose, pectin and guar gum on plasma insulin and metabolites in resting dogs **49**, 147A, 1990

Effects of guar gum or volatile fatty acid salts on activities of key enzymes for lipid synthesis in livers from rats given starch- or sucrose-containing diets **49**, 212A, 1990

Fermentation of wheat bran or sugar-beet fibre by human colonic bacteria growing in vitro in semi-continuous culture **49**, 124A, 1990

Fibre sources for the food industry **49**, 31–38, 1990

Influence of guar gum flour of different molecular weights on viscosity of jejunal digesta in the pig **49**, 53A, 1990

Mechanisms and experimental and epidemiological evidence relating dietary fibre (non-starch polysaccharides) and starch to protection against large bowel cancer **49**, 153–171, 1990

The effect of interactions of soluble (pectin) and insoluble (wheat bran) dietary fibres on caecal short-chain fatty acids and caecal tissue weight in the rat **49**, 231A, 1990

Dietary goals

Meeting the dietary goals: how and at what cost? **49**, 66A, 1990

Dietary intake

Dietary intake and thirst in patients with chronic renal failure **49**, 75A, 1990

Dietary supplements

Dietary supplementation in undernourished children with cystic fibrosis **49**, 95A, 1990

Effects of dietary supplementation on work performance in Gambian labourers **49**, 44A, 1990

Dietary survey

Age trends in nutrient intakes for non-manual and manual occupational groups: the Scottish Heart Health Study **49**, 63A, 1990

Dietary differences between social class groups in the Scottish Heart Health Study **49**, 62A, 1990

Energy and nutrient intakes of disabled and of elderly subjects as assessed using a combination method of dietary survey **49**, 56A, 1990

Sex, age and social class differences in attitudes towards consumption of high-fat foods **49**, 64A, 1990

The Northern Ireland dietary survey and related studies **49**, 289–296, 1990

Digestibility

Effects of cellulose, pectin and guar gum on gastric emptying, digestibility and absorption in resting dogs **49**, 146A, 1990

Dipeptides

Dipeptides in clinical nutrition **49**, 343–359, 1990

Doubly-labelled water method

Methane production by ruminants and its influence on the doubly-labelled water technique **49**, 10A, 1990

Embryo

Cell lineage and differentiation during growth of the early mammalian embryo **49**, 269–279, 1990

The nutrition and environment of the early human embryo **49**, 2A, 1990

Endotoxin

Plasma ^{65}Zn kinetics in zinc-deficient and endotoxin-treated rats **49**, 69A, 1990

Arm circumference and energy balance in critical illness **49**, 17A, 1990

Energy balance

Dietary energy intake and faecal energy excretion in normal healthy children **49**, 97A, 1990

Energy expenditure

Activity and energy expenditure of lactating women in rural Ghana **49**, 45A, 1990

C-reactive protein, sickness scores and energy expenditure in critical illness **49**, 184A, 1990

Energy expenditure in the severely traumatized patient: early experience **49**, 186A, 1990

Energy intake and energy expenditure in post-obese women and weight-matched controls **49**, 14A, 1990

For how long and how often should oxygen consumption be measured in the ventilated patient to assess 24 h energy expenditure **49**, 185A, 1990

Habitual exercise patterns and daily energy expenditure **49**, 119A, 1990

Plasma leucine turnover and oxidation in critically ill patients: lack of a relationship to energy expenditure **49**, 181A, 1990

Resting energy expenditure in cystic fibrosis **49**, 15A, 1990

The recovery of labelled carbon dioxide during a 36 h continuous infusion of bicarbonate in man **49**, 198A, 1990

Energy intake
Energy intake and basal metabolic rate in lean and overweight women during the menstrual cycle **49**, 224A, 1990
Energy intake and energy expenditure in post-obese women and weight-matched controls **49**, 14A, 1990
Energy intakes and weight loss in institutionalized psychogeriatic patients **49**, 16A, 1990
Repeated periods of dieting by women using a very low energy diet. 1. Effect on metabolic rate **49**, 11A, 1990
Repeated periods of dieting by women using a very low energy diet. 2. Effect on body composition **49**, 12A, 1990
The effect of a 3 d high-fat or high-carbohydrate diet on the responses to glucose ingestion in man **49**, 20A, 1990
The effect of the oestrous cycle in rats on carbohydrate consumption **49**, 223A, 1990
Weight changes during 7 d weighed energy intake studies in normal men **49**, 13A, 1990

Energy metabolism
Effect of raw peas on activities of key enzymes of lipid and carbohydrate metabolism in rat liver **49**, 52A, 1990
Intracellular calcium ions and intramitochondrial Ca^{2+} in the regulation of energy metabolism in mammalian tissues **49**, 57–75, 1990

Ephedrine
The effect of ephedrine and aspirin on the metabolic rate of lean and obese women **49**, 120A, 1990

Exercise
At 30 min post-ingestion the thermic effect of feeding is increased by prior high-intensity exercise **49**, 103A, 1990
Blood antioxidant status of runners in relation to training load **49**, 27A, 1990
Habitual exercise patterns and daily energy expenditure **49**, 119A, 1990

Fasting
The effect of fasting on plasma corticosterone kinetics in the anaesthetized rat **49**, 79A, 1990
The effect of feeding and fasting on human colonic tumours in vitro **49**, 166A, 1990

Fat cells
Differences between broiler and layer strains of chicken in the rate of adipocyte precursor proliferation **49**, 131A, 1990

Fatty acids
Adipose tissue fatty acids in patients undergoing coronary artery angioplasty **49**, 100A, 1990
Diet and plasma lipids in a group of vegetarians and omnivores **49**, 59A, 1990
Differential effects of dietary fatty acid saturation and chain length on lipogenesis in liver and mammary gland of lactating rats **49**, 3A, 1990
Effect of dietary fish oil on rat lymphocyte proliferation in vitro **49**, 113A, 1990
Effect of different dietary supplemental fats and oils on growth performance and fatty acid composition of tissues in female broilers **49**, 130A, 1990
Fatty acids, lipid peroxidation and diseases **49**, 261–267, 1990
Intracellular calcium, cell injury and relationships to free radicals and fatty acid metabolism **49**, 77–81, 1990
The effect of a fish oil supplement on the phospholipid fatty acid composition of plasma, platelets, neutrophils, lymphocytes and monocytes **49**, 114A, 1990
The effect of heated sunflower oil on concentrations of α-tocopherol and thiobarbituric acid-reacting substances in chick tissues **49**, 112A, 1990
The effect of interactions of soluble (pectin) and insoluble (wheat bran) dietary fibres on caecal short-chain fatty acids and caecal tissue weight in the rat **49**, 231A, 1990
Vascularization in the epididymal and perirenal fat pads of young and adult mice **49**, 101A, 1990

Feed evaluation
Dietary-induced thermogenesis and feed evaluation in ruminants **49**, 227–237, 1990

Fishmeal
Response of sheep to cimaterol and white fishmeal supplementation of diets containing sub-maintenance levels of energy **49**, 138A, 1990

Fish oil
Effect of dietary fish oil on rat lymphocyte proliferation in vitro **49**, 113A, 1990
The effect of a fish oil supplement on the phospholipid fatty acid composition of plasma, platelets, neutrophils, lymphocytes and monocytes **49**, 114A, 1990

Food budget
Constructing a modest-but-adequate food budget for households with two adults and one child aged 1–4 years **49**, 77A, 1990

Food contaminants
Chemical food contaminants in the initiation of cancer **49**, 133–144, 1990

Food intake
Cholecystokinin effects on wet and dry meals in pigs **49**, 222A, 1990
Effect of energy restriction on the relationship between body fat and food intake in broilers **49**, 215A, 1990
Effect of hepatic portal infusion of propionate or equivalent saline loads on food intake in sheep **49**, 221A, 1990
Growth and food intake responses of broiler and layer chickens to diets of different protein contents, and a choice of protein contents **49**, 217A, 1990
Is there a North/South divide? Regional variations in the diet of British adults **49**, 76A, 1990

Photoperiodic changes in food intake and rumen function in Soay rams **49**, 216A, 1990
The ability of broiler chickens to regulate protein intake when offered a choice of diets containing different levels of protein **49**, 218A, 1990
The effect of the oestrous cycle in rats on carbohydrate consumption **49**, 223A, 1990
The influence of meal composition and frequency of intake on the thermic effect of food **49**, 228A, 1990
The influences of meal composition on subsequent food selection in broiler and layer chickens **49**, 219A, 1990

Food processing
Fibre sources for the food industry **49**, 31–38, 1990
Food fortification **49**, 39–50, 1990
Food preservatives and the microbiological consequences of their reduction or omission **49**, 1–12, 1990
Implications of nutritional recommendations on sugar for product development **49**, 23–30, 1990
Nutritional recommendations for *n*-3 polyunsaturated fatty acids and the challenge to the food industry **49**, 13–21, 1990

Food restriction
The effect of chronic food restriction on contractile characteristics of rat skeletal muscle **49**, 84A, 1990

Fortification
Food fortification **49**, 39–50, 1990

Free radicals
A modified TRAP assay to measure pro-oxidant activity in serum **49**, 22A, 1990
Antioxidants and prooxidants in malnourished populations **49**, 247–259, 1990
Fatty acids, lipid peroxidation and diseases **49**, 261–267, 1990
Intracellular calcium, cell injury and relationships to free radicals and fatty acid metabolism **49**, 77–81, 1990
Iron free radicals and arthritis **49**, 239–245, 1990

Gastric contents
Nitrosation of amino acids and peptides in gastric contents **49**, 33A, 1990

Gastric secretion
Gastric juice ascorbic acid: effects of disease, hypochlorhydria and stimulation of gastric secretion **49**, 31A, 1990

Genetics
Genetic aspects of mammalian growth and survival in relation to body size **49**, 421–422, 1990

Glucose
Carbohydrate storage following muscle glycogen depletion as assessed by ^{13}C-labelled glucose **49**, 83A, 1990
Effect of two types of guar gum in solid and liquid foods on postprandial blood glucose, plasma insulin and C-peptide in healthy subjects **49**, 54A, 1990

Glucose infusion
Influence of intravenous glucose infusion on basal and growth hormone-stimulated plasma concentrations of insulin-like growth factor-1 in lambs **49**, 154A, 1990

Glucose ingestion
Net substrate deposition in human adipose tissue in vivo after glucose ingestion and during insulin infusion **49**, 21A, 1990
The effect of a 3 d high-fat or high-carbohydrate diet on the responses to glucose ingestion in man **49**, 20A, 1990

Glucose metabolism
The effect of underfeeding for 7 d on thermogenesis and glucose metabolism during infusion of glucose and insulin in healthy women **49**, 187A, 1990

Glutamine
Are intracellular glutamine concentrations related to muscle protein synthesis during dietary restrictions **49**, 176A, 1990
Do 'novel' enteral substrates improve nitrogen economy following surgical stress in dogs? **49**, 174A, 1990
Effect of glutamine infusions on muscle glutamine concentration and protein synthetic rate in rat muscle **49**, 175A, 1990

Glycine status
Urinary 5-oxoproline in term and preterm neonates as an index of glycine status **49**, 230A, 1990

Glycoconjugates
Effect of lactation on the postnatal expression of intestinal membrane glycoconjugates in pigs **49**, 142A, 1990

Glycogen
A non-invasive method for assessing muscle glycogen stores by whole-body calorimetry **49**, 82A, 1990
Carbohydrate storage following muscle glycogen depletion as assessed by ^{13}C-labelled glucose **49**, 83A, 1990

Gonadectomy
The effects of gonadectomy on weight gain and corticosterone metabolism in rats **49**, 7A, 1990

Government policy
Government: where does nutrition policy come from? **49**, 397–401, 1990

Growth
Body composition: the precision and accuracy of new methods and their suitability for longitudinal studies **49**, 423–436, 1990
Cell lineage and differentiation during growth of the early mammalian embryo **49**, 269–279, 1990
Effect of different dietary supplemental fats and oils on growth performance and fatty acid composition of tissues in female broilers **49**, 130A, 1990
Ethnic and geographic variation in growth of Hong Kong Chinese infants **49**, 118A, 1990

Genetic aspects of mammalian growth and survival in relation to body size **49**, 421–422, 1990
Growth and food intake responses of broiler and layer chickens to diets of different protein contents, and a choice of protein contents **49**, 217A, 1990
Growth in perspective **49**, 411–420, 1990
Investigation of the effects of insulin-like growth factor-1 and age on cartilage growth using *in situ* biochemical techniques **49**, 152A, 1990
Regulation and action of insulin-like growth factors at the cellular level **49**, 451–458, 1990
Regulation of long bone growth in vitro: effects of insulin-like growth factor-1 and growth hormone **49**, 151A, 1990
Some endocrine responses during heat stress induce depression of growth in young domestic fowl **49**, 129A, 1990
The 'anabolic' effect of subcutaneous testosterone implants in rats **49**, 214A, 1990
The influence of dietary composition on the growth of the domestic cat **49**, 157A, 1990
Vitamin D and other extracellular factors in the control of growth **49**, 91–101, 1990

Growth disorders
Total body water measurement in children with growth disorders **49**, 199A, 1990

Growth hormone
Effects of growth hormone and nutrient interactions on ovine adipose tissue metabolism **49**, 153A, 1990
Influence of intravenous glucose infusion on basal and growth hormone-stimulated plasma concentrations of insulin-like growth factor-1 in lambs **49**, 154A, 1990
Interactions between protein supply and the effect of growth hormone administration on plasma insulin-like growth factor-1 concentrations in infusion-maintained lambs **49**, 155A, 1990
Nutritional control of circulating insulin-like growth factor-1 and growth hormone concentrations in growing pigs **49**, 156A, 1990

Growth promotion
Growth promoters in humans **49**, 467–472, 1990
Growth promotion in farm animals **49**, 459–466, 1990

Growth regulation
Endogenous mediators of growth **49**, 443–450, 1990
Similarities and differences between mechanisms of organ and tissue growth regulation **49**, 437–442, 1990

Guar gum
Differential response in rat gut hypertrophy to inclusion of guar gum and volatile fatty acid salts in the diet **49**, 211A, 1990
Effect of two types of guar gum in solid and liquid foods on postprandial blood glucose, plasma insulin and C-peptide in healthy subjects **49**, 54A, 1990
Effects of cellulose, pectin and guar gum on gastric emptying, digestibility and absorption in resting dogs **49**, 146A, 1990
Effects of cellulose, pectin and guar gum on plasma insulin and metabolites in resting dogs **49**, 147A, 1990
Effects of guar gum or volatile fatty acid salts on activities of key enzymes for lipid synthesis in livers from rats given starch- or sucrose-containing diets **49**, 212A, 1990
Influence of guar gum flour of different molecular weights on viscosity of jejunal digesta in the pig **49**, 53A, 1990

Gut hypertrophy
Differential response in rat gut hypertrophy to inclusion of guar gum and volatile fatty acid salts in the diet **49**, 211A, 1990

Haemodialysis
Systemic carnitine deficiency: an animal model produced by haemodialysis of sheep **49**, 148A, 1990

Heat stress
Some endocrine responses during heat stress induce depression of growth in young domestic fowl **49**, 129A, 1990

High altitude
Energy and nutrient intakes during high-altitude acclimatization **49**, 121A, 1990

Hind-limb metabolism
The effects of femoral arterial infusion of cimaterol on hind-limb metabolism in growing lambs **49**, 139A, 1990

Homocysteine
The effect of copper deficiency on plasma homocysteine in the rat **49**, 106A, 1990

Hospital patients
A critical assessment of leucocyte zinc as an index of Zn status in chronically ill hospitalized elderly patients **49**, 71A, 1990
Arm circumference and energy balance in critical illness **49**, 17A, 1990
The relationship between leucocyte and muscle zinc in surgical patients with and without gastrointestinal cancer **49**, 72A, 1990

Hypertension
Intra- and extracellular calcium and hypertension **49**, 83–90, 1990

Ileostomy
Bacterial fermentation occurs in the terminal ileum of ileostomates **49**, 110A, 1990

Immune system
Immune function in vitamin E-deficient rats **49**, 30A, 1990
No diminution of complement activity or oxidative respiratory burst capacity with copper deficiency in the rat immune system **49**, 107A, 1990

Impedance analysis
Assessment of body composition by bioelectrical impedance compared with anthropometry, total body potassium and tritiated water dilution **49**, 195A, 1990

Infant milk formulae
Absorption of iron and zinc from soya- and cow's milk-based infant formulae in sucking rats **49**, 108A, 1990

Infants
Background variations in breath carbon-13 enrichment in free-living infants and toddlers **49**, 5A, 1990
Protein requirements of infants: an operational assessment **49**, 499–506, 1990

Infection
Effect of nutritional level and body condition on susceptibility of N'Dama cattle to *Trypanosoma congolense* infection in The Gambia **49**, 209A, 1990
Role of bovine milk lactoperoxidase system in *Escherichia coli* diarrhoea – development of a model using the early-weaned pig **49**, 213A, 1990

Inflammation
Effect of glutamine infusions on muscle glutamine concentration and protein synthetic rate in rat muscle **49**, 175A, 1990
Effect of protein deficiency on circulating protein concentrations during the acute phase response to injury **49**, 159A, 1990
The effect of human interleukin-1β on rat liver protein synthesis compared with a systemic inflammatory insult induced by turpentine **49**, 162A, 1990
Which cytokine modulates the acute phase response to elective surgery and accidental injury? **49**, 160A, 1990

Inflammatory bowel disease
Measurement of tissue protein synthesis in pathological conditions of the gastrointestinal tract in man **49**, 135A, 1990

Injury metabolism
Growth promoters in humans **49**, 467–472, 1990

Institutionalized elderly
Energy intakes and weight loss in institutionalized psychogeriatic patients **49**, 16A, 1990

Insulin
Effects of cellulose, pectin and guar gum on plasma insulin and metabolites in resting dogs **49**, 147A, 1990
Insulin regulates the uncoupling protein content of brown adipose tissue **49**, 133A, 1990
Net substrate deposition in human adipose tissue in vivo after glucose ingestion and during insulin infusion **49**, 21A, 1990
[^{15}N]phenylalanine and L-[1-^{13}C]leucine leg exchange and plasma kinetics during amino acid infusion and euglycaemic hyperinsulinaemia: evidence for stimulation of muscle and whole-body protein synthesis in man by insulin **49**, 179A, 1990
Role of the sympathetic nervous system in the regulation by insulin of the level of uncoupling protein in brown adipose tissue **49**, 227A, 1990

Insulin-like growth factor-1
Influence of intravenous glucose infusion on basal and growth hormone-stimulated plasma concentrations of insulin-like growth factor-1 in lambs **49**, 154A, 1990
Interactions between protein supply and the effect of growth hormone administration on plasma insulin-like growth factor-1 concentrations in infusion-maintained lambs **49**, 155A, 1990
Investigation of the effects of insulin-like growth factor-1 and age on cartilage growth using *in situ* biochemical techniques **49**, 152A, 1990
Nutritional control of circulating insulin-like growth factor-1 and growth hormone concentrations in growing pigs **49**, 156A, 1990
Regulation and action of insulin-like growth factors at the cellular level **49**, 451–458, 1990
Regulation of long bone growth in vitro: effects of insulin-like growth factor-1 and growth hormone **49**, 151A, 1990

Interleukins
Adrenalectomy reverses the impaired pyrogenic responses to interleukin-1β in obese Zucker rats **49**, 163A, 1990
Serum interleukin-6 and C-reactive protein response to elective surgery of varying magnitude **49**, 161A, 1990
The effect of human interleukin-1β on rat liver protein synthesis compared with a systemic inflammatory insult induced by turpentine **49**, 162A, 1990

Intestinal membrane
Effect of lactation on the postnatal expression of intestinal membrane glycoconjugates in pigs **49**, 142A, 1990

Intestinal protein flow
Rumen probiosis: the effects of addition of yeast culture (viable yeast (*Saccharomyces cerevisiae*) plus growth medium) on duodenal protein flow in wether sheep **49**, 128A, 1990

In vitro fertilization
The nutrition and environment of the early human embryo **49**, 2A, 1990

Iran
Rationing and wartime food policies in Iran **49**, 46A, 1990

Ireland
Dietary methodology: implications of errors in the measurement **49**, 281–287, 1990
Dietary patterns in the Belfast MONICA Project **49**, 297–305, 1990
Nutrient intakes in socially disadvantaged groups in Ireland **49**, 307–321, 1990
Nutritional surveillance in Ireland: theory and practice **49**, 333–341, 1990
Sodium and potassium intakes in Ireland **49**, 323–332, 1990
The Northern Ireland dietary survey and related studies **49**, 289–296, 1990

Iron
Absorption of iron and zinc from human milk in suckling and weanling rats **49**, 70A, 1990

Absorption of iron and zinc from soya- and cow's milk-based infant formulae in sucking rats **49**, 108A, 1990
Dietary assessment of iron intake as a reflection of Fe status **49**, 99A, 1990
Iron free radicals and arthritis **49**, 239–245, 1990

Iron deficiency
Iron deficiency anaemia in long-term institutionalized elderly women in Northern Ireland **49**, 92A, 1990

Iron status
Alcohol consumption and measurements of iron status **49**, 23A, 1990

Ischaemic heart disease
Adipose tissue fatty acids in patients undergoing coronary artery angioplasty **49**, 100A, 1990
Total peroxyl radical-trapping antioxidant potential of serum in myocardial infarction **49**, 109A, 1990

Isotope ratio measurements
The time dependence of nitrous oxide interference in ^{13}C and ^{18}O isotope ratio measurements in breath and plasma after inhalation by mask **49**, 201A, 1990

Ketone bodies
Ketone bodies as substrates **49**, 361–373, 1990
Ketone body metabolism during starvation **49**, 192A, 1990

Ketosis
Post-operative ketosis: relationship to serum non-esterified fatty acids, carnitine and metabolic hormone concentrations **49**, 171A, 1990
Relationship of post-surgical ketosis and nitrogen loss to anthropometric and biochemical indices of nutritional status on admission to hospital **49**, 191A, 1990

Kidney beans
Phaseolus vulgaris lectin (PHA) induces growth of rat small intestine **49**, 144A, 1990

Lactation
Activity and energy expenditure of lactating women in rural Ghana **49**, 45A, 1990
Differential effects of dietary fatty acid saturation and chain length on lipogenesis in liver and mammary gland of lactating rats **49**, 3A, 1990

Lactation products
Effect of lactation on the postnatal expression of intestinal membrane glycoconjugates in pigs **49**, 142A, 1990
Effect of lactation products on brush-border enzyme expression in sucking pigs **49**, 141A, 1990

Lactoperoxidase
Role of bovine milk lactoperoxidase system in *Escherichia coli* diarrhoea – development of a model using the early-weaned pig **49**, 213A, 1990

Large bowel fermentation
Effect of the intestinal microflora and dietary fibre on colonic epithelial cell proliferation **49**, 37A, 1990
Large bowel fermentation in rats given raw peas in the diet **49**, 51A, 1990
Stimulation of large bowel fermentation has no effects on duodenal epithelial proliferation in rats given white bread-based diets **49**, 38A, 1990

Large intestine
Dietary organic anions can make a significant contribution to the total fermentable material in the human large intestine **49**, 226A, 1990

Lectins
Phaseolus vulgaris lectin (PHA) induces growth of rat small intestine **49**, 144A, 1990

Lipid emulsions
New developments in fat emulsions **49**, 375–380, 1990

Lipid infusion
Metabolic effects of lipid infusion in septic and non-septic humans **49**, 170A, 1990

Lipid peroxidation
Effect of dietary α-tocopherol level on susceptibility of chicken tissues to lipid peroxidation **49**, 28A, 1990

Lipid synthesis
Effects of guar gum or volatile fatty acid salts on activities of key enzymes for lipid synthesis in livers from rats given starch- or sucrose-containing diets **49**, 212A, 1990

Lipogenesis
Differential effects of dietary fatty acid saturation and chain length on lipogenesis in liver and mammary gland of lactating rats **49**, 3A, 1990
Lipogenesis measured in vivo in tumour-bearing rats **49**, 40A, 1990

Lipoprotein lipase activity
Lipoprotein lipase activity in tissues of tumour-bearing rats **49**, 193A, 1990

Liver
Effect of volatile anaesthetic agents on liver protein synthesis **49**, 182A, 1990

Liver disease
Neutrophil zinc is related to the severity of hepatic damage in patients with liver disease **49**, 73A, 1990

Liver failure
Nutritional requirements in fulminant hepatic failure **49**, 172A, 1990

Lupinseed
Nutritional evaluation of sweet lupinseed (*Lupinus angustifolius*) **49**, 145A, 1990

Lymphocytes
Effect of dietary fish oil on rat lymphocyte proliferation in vitro **49**, 113A, 1990

Malnutrition
Seasonal child malnutrition in Gilan, Iran: the role of maternal work load and sedative drugs **49**, 116A, 1990
Urinary sulphates in children recovering from severe malnutrition **49**, 117A, 1990

Menstrual cycle
Energy intake and basal metabolic rate in lean and overweight women during the menstrual cycle **49**, 224A, 1990
Metabolic model
Whole-body protein homeostasis and protein requirements in man: validation studies of a new metabolic model **49**, 194A, 1990
Metabolic rate
Assessment of the errors in the calculation of metabolic rate from respiratory gas exchange measurements using Weir's (1949) method **49**, 78A, 1990
At 30 min post-ingestion the thermic effect of feeding is increased by prior high-intensity exercise **49**, 103A, 1990
Repeated periods of dieting by women using a very low energy diet. 1. Effect on metabolic rate **49**, 11A, 1990
The effect of ephedrine and aspirin on the metabolic rate of lean and obese women **49**, 120A, 1990
Metallothionein-I
Effects of protein deficiency on blood cell and tissue metallothionein-I concentrations in rats **49**, 68A, 1990
Influence of tumour necrosis factor α on blood cell and plasma metallothionein-I concentrations in rats **49**, 136A, 1990
Methane
Methane production by ruminants and its influence on the doubly-labelled water technique **49**, 10A, 1990
Milk
Effect of α-tocopherol supplementation of sow's diet on milk α-tocopherol levels and on α-tocopherol transfer to the suckling piglet **49**, 111A, 1990
Mineral intake
Associations of breed and nematodiasis with intake of a free-access mineral mixture by grazing lambs **49**, 220A, 1990
Mineral supplementation
Sodium supplementation and phosphorus supplementation of lactating N'Dama cows under village husbandry conditions in The Gambia **49**, 210A, 1990
MONICA project
Dietary patterns in the Belfast MONICA Project **49**, 297–305, 1990
Mountaineering
Energy and nutrient intakes during high-altitude acclimatization **49**, 121A, 1990
Muscle
The effect of chronic food restriction on contractile characteristics of rat skeletal muscle **49**, 84A, 1990
Muscle atrophy
Modification by clenbuterol of muscle atrophy induced by unilateral femur fracture plus protein–energy deficiency in the rat **49**, 190A, 1990
Muscle mass
A comparison of skeletal muscle mass in rabbits as measured by dissection and by creatine dilution **49**, 81A, 1990
Myotonia dystrophica
Glucose-induced thermogenesis is reduced in myotonia dystrophica **49**, 188A, 1990

Near infra-red interactance
Assessment of body composition: near infra-red interactance **49**, 197A, 1990
Nematodiasis
Associations of breed and nematodiasis with intake of a free-access mineral mixture by grazing lambs **49**, 220A, 1990
Neonate
Urinary 5-oxoproline in term and preterm neonates as an index of glycine status **49**, 230A, 1990
Nitrogen metabolism
Analysis of isotope ratio disproportionation for evaluation of dietary requirements and of nitrogen metabolism in vivo **49**, 85A, 1990
Nitrous oxide
The time dependence of nitrous oxide interference in ^{13}C and ^{18}O isotope ratio measurements in breath and plasma after inhalation by mask **49**, 201A, 1990
Noradrenaline
Histological changes in brown adipose tissue associated with weight loss in obese Zucker rats resulting from the combined administration of neuropeptide Y and noradrenaline **49**, 102A, 1990
Plasma noradrenaline concentrations and thermogenic responses to injected noradrenaline in the rat **49**, 18A, 1990
North/South divide
Is there a North/South divide? Regional variations in the diet of British adults **49**, 76A, 1990
Nutrient composition
Comparison of computerized nutrient calculations and analysed values for water, protein, fat, calcium, iron, sodium and potassium in cooked dishes eaten in Ireland **49**, 90A, 1990
Nutrient intake
Contribution of foods eaten outside the home to nutrient intake **49**, 74A, 1990
Dietary methodology: implications of errors in the measurement **49**, 281–287, 1990
Dietary patterns in the Belfast MONICA Project **49**, 297–305, 1990
Energy and nutrient intakes during high-altitude acclimatization **49**, 121A, 1990
Energy and nutrient intakes of disabled and of elderly subjects as assessed using a combination method of dietary survey **49**, 56A, 1990
Nutrient intakes in socially disadvantaged groups in Ireland **49**, 307–321, 1990

Nutritional surveillance in Ireland: theory and practice **49**, 333–341, 1990
Sodium and potassium intakes in Ireland **49**, 323–332, 1990
The influence of dietary composition on the growth of the domestic cat **49**, 157A, 1990
The Northern Ireland dietary survey and related studies **49**, 289–296, 1990

Nutrition education
Beliefs and attitudes toward healthier eating among women attending a maternity hospital **49**, 65A, 1990
Food knowledge and 'healthy' diets in people with and without coronary heart disease **49**, 225A, 1990
Meeting the dietary goals: how and at what cost? **49**, 66A, 1990
What can and what cannot be achieved by nutrition education? A challenge for the 1990s **49**, 389–395, 1990

Nutritional requirements
Nutritional requirements in fulminant hepatic failure **49**, 172A, 1990

Nutritional status
Albumin and prealbumin as nutritional indicators **49**, 87A, 1990
Relationship of post-surgical ketosis and nitrogen loss to anthropometric and biochemical indices of nutritional status on admission to hospital **49**, 191A, 1990

Nutritional support
A controlled trial of sip-feed supplements in orthopaedic patients: post-discharge clinical outcome in relation to supplementation and compliance **49**, 173A, 1990
Stimulation of colorectal tumour protein synthesis, in vivo, by nutritional support **49**, 165A, 1990

Nutritionists
What YOU think causes obesity **49**, 43A, 1990

Oats
Hypocholesterolaemic and other responses to oat bran intake in humans **49**, 50A, 1990
Oats, gastrointestinal cell proliferation and serum cholesterol in the rat **49**, 39A, 1990

Obesity
Adrenalectomy reverses the impaired pyrogenic responses to interleukin-1β in obese Zucker rats **49**, 163A, 1990
Elevated corticosterone-sensitive enzyme activities in obese Zucker rat brain **49**, 80A, 1990
Energy intake and energy expenditure in post-obese women and weight-matched controls **49**, 14A, 1990
Histological changes in brown adipose tissue associated with weight loss in obese Zucker rats resulting from the combined administration of neuropeptide Y and noradrenaline **49**, 102A, 1990
The effect of ephedrine and aspirin on the metabolic rate of lean and obese women **49**, 120A, 1990
What YOU think causes obesity **49**, 43A, 1990

Oestrous cycle
The effect of the oestrous cycle in rats on carbohydrate consumption **49**, 223A, 1990

Old age
Energy and nutrient intakes of disabled and of elderly subjects as assessed using a combination method of dietary survey **49**, 56A, 1990
Energy intakes and weight loss in institutionalized psychogeriatic patients **49**, 16A, 1990
Iron deficiency anaemia in long-term institutionalized elderly women in Northern Ireland **49**, 92A, 1990
Vitamin E alters T cell subsets in elderly patients **49**, 29A, 1990

Ornithine α-ketoglutarate
Novel substrates and nutritional support: possible role of ornithine α-ketoglutarate **49**, 381–387, 1990

Osteoporosis
The bone mineral content of Gambian and Cambridge women **49**, 123A, 1990

Overfeeding
Thermogenesis above maintenance in humans **49**, 217–226, 1990

Oxalate
Dietary organic anions can make a significant contribution to the total fermentable material in the human large intestine **49**, 226A, 1990

5-Oxoproline
Urinary 5-oxoproline in term and preterm neonates as an index of glycine status **49**, 230A, 1990

5-Oxoproline excretion
The urinary excretion of 5-oxoproline in healthy term infants **49**, 6A, 1990

Oxygen content
The oxygen content of total parenteral nutrition mixtures stored in different container systems **49**, 205A, 1990

Parenteral nutrition
Dipeptides in clinical nutrition **49**, 343–359, 1990
Ketone bodies as substrates **49**, 361–373, 1990
Metabolic effects of lipid infusion in septic and non-septic humans **49**, 170A, 1990
New developments in fat emulsions **49**, 375–380, 1990
Novel substrates and nutritional support: possible role of ornithine α-ketoglutarate **49**, 381–387, 1990
Prevention and management of venous thrombosis complicating central parenteral nutrition: a clinical audit **49**, 204A, 1990
The oxygen content of total parenteral nutrition mixtures stored in different container systems **49**, 205A, 1990

Phospholipids
The effect of a fish oil supplement on the phospholipid fatty acid composition of plasma, platelets, neutrophils, lymphocytes and monocytes **49**, 114A, 1990
Phosphorous
Breast-milk calcium and phosphorus concentrations of British and Gambian mothers during prolonged lactation **49**, 4A, 1990
Photoperiod
Photoperiodic changes in food intake and rumen function in Soay rams **49**, 216A, 1990
Placenta
Protein synthesis in human term placenta, umbilical cord and uterus **49**, 183A, 1990
Polychlorinated biphenyls
Human milk: a source of potentially toxic and carcinogenic halosubstituted biphenyls **49**, 34A, 1990
Polyunsaturated fatty acids
Nutritional recommendations for *n*-3 polyunsaturated fatty acids and the challenge to the food industry **49**, 13–21, 1990
Potassium intake
Sodium and potassium intakes in Ireland **49**, 323–332, 1990
Prealbumin
Albumin and prealbumin as nutritional indicators **49**, 87A, 1990
Pregnancy
Beliefs and attitudes toward healthier eating among women attending a maternity hospital **49**, 65A, 1990
Protein synthesis in human term placenta, umbilical cord and uterus **49**, 183A, 1990
Preservatives
Food preservatives and the microbiological consequences of their reduction or omission **49**, 1–12, 1990
Prostaglandin E_2
Coconut oil feeding suppresses hypothalamic prostaglandin E_2 production in response to tumour necrosis factor α and endotoxin **49**, 164A, 1990
Protein deficiency
Effect of protein deficiency on circulating protein concentrations during the acute phase response to injury **49**, 159A, 1990
Effects of protein deficiency on blood cell and tissue metallothionein-I concentrations in rats **49**, 68A, 1990
Protein digestibility
Protein digestibility measured by ^{15}N and homoarginine **49**, 48A, 1990
Protein intake
Adaptation to a low-protein intake in normal adults: increased production and hydrolysis of urea **49**, 229A, 1990
Protein metabolism
Changes in protein metabolism of cultured muscle cells treated with cimaterol **49**, 137A, 1990
Protein requirements
Amino acid needs and protein scoring patterns **49**, 489–497, 1990
Maintenance protein requirements: the need for conceptual re-evaluation **49**, 473–487, 1990
Protein requirements for catch-up growth **49**, 507–516, 1990
Protein requirements of infants: an operational assessment **49**, 499–506, 1990
Whole-body protein homeostasis and protein requirements in man: validation studies of a new metabolic model **49**, 194A, 1990
Protein synthesis
Amino acids promote net phenylalanine balance and protein synthesis in legs of anaesthetized young pigs independently of insulin or glucagon **49**, 180A, 1990
Are intracellular glutamine concentrations related to muscle protein synthesis during dietary restrictions **49**, 176A, 1990
Baseline measurements for stable isotope studies **49**, 122A, 1990
Do rates of protein synthesis differ in separate biopsies from the same tumour? **49**, 36A, 1990
Effect of glutamine infusions on muscle glutamine concentration and protein synthetic rate in rat muscle **49**, 175A, 1990
Effect of volatile anaesthetic agents on liver protein synthesis **49**, 182A, 1990
Effects of corticosteroid therapy on quadriceps protein synthesis and intramuscular prostaglandin concentration in patients with rheumatoid arthritis **49**, 169A, 1990
Measurement of tissue protein synthesis in pathological conditions of the gastrointestinal tract in man **49**, 135A, 1990
[^{15}N]phenylalanine and L-[1-^{13}C]leucine leg exchange and plasma kinetics during amino acid infusion and euglycaemic hyperinsulinaemia: evidence for stimulation of muscle and whole-body protein synthesis in man by insulin **49**, 179A, 1990
Protein synthesis in human term placenta, umbilical cord and uterus **49**, 183A, 1990
Stimulation of colorectal tumour protein synthesis, in vivo, by nutritional support **49**, 165A, 1990
The effect of feeding and fasting on human colonic tumours in vitro **49**, 166A, 1990
The effect of human interleukin-1β on rat liver protein synthesis compared with a systemic inflammatory insult induced by turpentine **49**, 162A, 1990
Use of a large dose, stable isotope procedure to measure muscle protein synthesis in sheep **49**, 134A, 1990
Protein turnover
Plasma leucine turnover and oxidation in critically ill patients: lack of a relationship to energy expenditure **49**, 181A, 1990
Reduction–oxidation state and protein turnover in rats treated with a non-selective β-agonist **49**, 140A, 1990

Protein utilization
Protein utilization during energy undernutrition in steers **49**, 208A, 1990

Questionnaire
Development and validation of a diet questionnaire for health education **49**, 55A, 1990
Diet and health in a random sample of British adults **49**, 57A, 1990

Rationing
Rationing and wartime food policies in Iran **49**, 46A, 1990

Recorded food intake
Weight changes during 7 d weighed energy intake studies in normal men **49**, 13A, 1990

Reduction–oxidation state
Reduction–oxidation state and protein turnover in rats treated with a non-selective β-agonist **49**, 140A, 1990

Renal failure
An evaluation of a high-fibre diet in the dietetic treatment of patients on regular haemodialysis **49**, 94A, 1990
Dietary intake and thirst in patients with chronic renal failure **49**, 75A, 1990
Systemic carnitine deficiency: an animal model produced by haemodialysis of sheep **49**, 148A, 1990

Respiratory gas exchange
Assessment of the errors in the calculation of metabolic rate from respiratory gas exchange measurements using Weir's (1949) method **49**, 78A, 1990

Rheumatoid arthritis
Effects of corticosteroid therapy on quadriceps protein synthesis and intramuscular prostaglandin concentration in patients with rheumatoid arthritis **49**, 169A, 1990

Rotavirus infection
The interaction of vitamin A deficiency and rotavirus infection **49**, 67A, 1990

Rumen fermentation
The effects of yeast culture on yeast numbers and fermentation in the rumen of sheep **49**, 47A, 1990

Rumen function
Photoperiodic changes in food intake and rumen function in Soay rams **49**, 216A, 1990

Rumen probiosis
Rumen probiosis: the effects of addition of yeast culture (viable yeast (*Saccharomyces cerevisiae*) plus growth medium) on duodenal protein flow in wether sheep **49**, 128A, 1990

Ruminant intestine
Observation of anaerobic fungi in the ruminant intestine **49**, 125A, 1990

Rusitec
Rusitec: a convenient device to study the digestive activity of anaerobic rumen fungi **49**, 126A, 1990
Wheat straw degradation, in Rusitec, in the presence or absence of rumen anaerobic fungi **49**, 127A, 1990

Scottish Heart Health Study
Age trends in nutrient intakes for non-manual and manual occupational groups: the Scottish Heart Health Study **49**, 63A, 1990
Dietary differences between social class groups in the Scottish Heart Health Study **49**, 62A, 1990

Sedative drugs
Seasonal child malnutrition in Gilan, Iran: the role of maternal work load and sedative drugs **49**, 116A, 1990

Selenium
Selenium depletion and repletion: effects on the thyroid gland in the rat **49**, 32A, 1990

Sepsis
Metabolic effects of lipid infusion in septic and non-septic humans **49**, 170A, 1990
Plasma leucine turnover and oxidation in critically ill patients: lack of a relationship to energy expenditure **49**, 181A, 1990

Sex hormones
Plasma testosterone, oestradiol and sex hormone binding globulin in Indian vegetarian women compared with Caucasian vegetarians and omnivores **49**, 8A, 1990
Testosterone, sex hormone binding globulin, and calculated free testosterone in male vegans and omnivores **49**, 9A, 1990

Small intestine
Phaseolus vulgaris lectin (PHA) induces growth of rat small intestine **49**, 144A, 1990

Sodium intake
Sodium and potassium intakes in Ireland **49**, 323–332, 1990

Sodium pump
The sodium pump and other mechanisms of thermogenesis in selected tissues **49**, 185–202, 1990

Soya bean
Effects of long-term (2 year) feeding of rats on raw soya bean **49**, 143A, 1990

Sport
Growth promoters in humans **49**, 467–472, 1990

Stable isotopes
Baseline measurements for stable isotope studies **49**, 122A, 1990
Use of a large dose, stable isotope procedure to measure muscle protein synthesis in sheep **49**, 134A, 1990

Starvation
Ketone body metabolism during starvation **49**, 192A, 1990

Sugar
Implications of nutritional recommendations on sugar for product development **49**, 23–30, 1990

Sugar intake
Intakes of individual sugars in Britain **49**, 58A, 1990

Sulphate excretion
Urinary sulphates in children recovering from severe malnutrition **49**, 117A, 1990

Sunflower oil
The effect of heated sunflower oil on concentrations of α-tocopherol and thiobarbituric acid-reacting substances in chick tissues **49**, 112A, 1990

Surgery
A controlled trial of sip-feed supplements in orthopaedic patients: post-discharge clinical outcome in relation to supplementation and compliance **49**, 173A, 1990
Brown adipose tissue activity in children in relation to disease state **49**, 189A, 1990
Do 'novel' enteral substrates improve nitrogen economy following surgical stress in dogs? **49**, 174A, 1990
Metabolic effects of lipid infusion in septic and non-septic humans **49**, 170A, 1990
Post-operative ketosis: relationship to serum non-esterified fatty acids, carnitine and metabolic hormone concentrations **49**, 171A, 1990
Relationship of post-surgical ketosis and nitrogen loss to anthropometric and biochemical indices of nutritional status on admission to hospital **49**, 191A, 1990
Serum interleukin-6 and C-reactive protein response to elective surgery of varying magnitude **49**, 161A, 1990
Which cytokine modulates the acute phase response to elective surgery and accidental injury? **49**, 160A, 1990

Tartrate
Dietary organic anions can make a significant contribution to the total fermentable material in the human large intestine **49**, 226A, 1990

Testosterone
The 'anabolic' effect of subcutaneous testosterone implants in rats **49**, 214A, 1990

Thermic effect of food
The influence of meal composition and frequency of intake on the thermic effect of food **49**, 228A, 1990

Thermogenesis
Dietary-induced thermogenesis and feed evaluation in ruminants **49**, 227–237, 1990
Glucose-induced thermogenesis is reduced in myotonia dystrophica **49**, 188A, 1990
Plasma noradrenaline concentrations and thermogenic responses to injected noradrenaline in the rat **49**, 18A, 1990
The effect of underfeeding for 7 d on thermogenesis and glucose metabolism during infusion of glucose and insulin in healthy women **49**, 187A, 1990
The sodium pump and other mechanisms of thermogenesis in selected tissues **49**, 185–202, 1990
Thermogenesis above maintenance in humans **49**, 217–226, 1990
Thyroid hormones and thermogenesis **49**, 203–215, 1990

Thyroid gland
Selenium depletion and repletion: effects on the thyroid gland in the rat **49**, 32A, 1990

Thyroid hormones
Thyroid hormones and thermogenesis **49**, 203–215, 1990

α-Tocopherol
Effect of dietary α-tocopherol level on susceptibility of chicken tissues to lipid peroxidation **49**, 28A, 1990
Effect of α-tocopherol supplementation of sow's diet on milk α-tocopherol levels and on α-tocopherol transfer to the suckling piglet **49**, 111A, 1990
The effect of heated sunflower oil on concentrations of α-tocopherol and thiobarbituric acid-reacting substances in chick tissues **49**, 112A, 1990

Total body water
The bromide space in endotoxaemia: a poor reflection of extracellular volume? **49**, 200A, 1990
Total body water measurement in children with growth disorders **49**, 199A, 1990

Total parenteral nutrition
Increased retention of urea nitrogen in patients on total parenteral nutrition **49**, 104A, 1990

Trauma
Energy expenditure in the severely traumatized patient: early experience **49**, 186A, 1990

***Trypanosoma congolense* infection**
Effect of nutritional level and body condition on susceptibility of N'Dama cattle to *Trypanosoma congolense* infection in The Gambia **49**, 209A, 1990

Tumour growth
Fatty acids, lipid peroxidation and diseases **49**, 261–267, 1990
Lipoprotein lipase activity in tissues of tumour-bearing rats **49**, 193A, 1990
Stimulation of colorectal tumour protein synthesis, in vivo, by nutritional support **49**, 165A, 1990
The effect of arginine on the growth of experimental tumours **49**, 168A, 1990
The effect of feeding and fasting on human colonic tumours in vitro **49**, 166A, 1990

Tumour necrosis factor
Coconut oil feeding suppresses hypothalamic prostaglandin E_2 production in response to tumour necrosis factor α and endotoxin **49**, 164A, 1990
Influence of tumour necrosis factor α on blood cell and plasma metallothionein-I concentrations in rats **49**, 136A, 1990

Uncoupling protein
Insulin regulates the uncoupling protein content of brown adipose tissue **49**, 133A, 1990
Is brown adipose tissue present in the pig? **49**, 132A, 1990

Role of the sympathetic nervous system in the regulation by insulin of the level of uncoupling protein in brown adipose tissue
49, 227A, 1990

Underfeeding
The effect of underfeeding for 7 d on thermogenesis and glucose metabolism during infusion of glucose and insulin in healthy women **49**, 187A, 1990

Undernutrition
Antioxidants and prooxidants in malnourished populations **49**, 247–259, 1990
Protein utilization during energy undernutrition in steers **49**, 208A, 1990
Use of a hypoallergenic casein hydrolysate diet in the rehabilitation of severely malnourished Gambian children with chronic diarrhoea
49, 202A, 1990

Urea
Adaptation to a low-protein intake in normal adults: increased production and hydrolysis of urea **49**, 229A, 1990
Comparative studies of the defunctioned and functioning colon in patients with a defunctioning colostomy confirm human colonic permeability to urea **49**, 177A, 1990
The movement of intact urea across the mucosa of the defunctioned human colon
49, 49A, 1990
Urea production rates with two different amino acid solutions **49**, 203A, 1990

Urea kinetics
The intra-individual variation in urea kinetics measured in a single individual over a period of 4 years **49**, 105A, 1990

Urea nitrogen
Increased retention of urea nitrogen in patients on total parenteral nutrition **49**, 104A, 1990

Vegans
Testosterone, sex hormone binding globulin, and calculated free testosterone in male vegans and omnivores **49**, 9A, 1990

Vegetarians
Diet and plasma lipids in a group of vegetarians and omnivores **49**, 59A, 1990
Nutrient intakes by vegetarians in Newcastle upon Tyne **49**, 93A, 1990
Plasma testosterone, oestradiol and sex hormone binding globulin in Indian vegetarian women compared with Caucasian vegetarians and omnivores **49**, 8A, 1990
What do 'vegetarians' eat? **49**, 60A, 1990
Who are 'vegetarians' and what do they think about food? **49**, 61A, 1990

Venous thrombosis
Prevention and management of venous thrombosis complicating central parenteral nutrition: a clinical audit **49**, 204A, 1990

Viscosity of digesta
Influence of guar gum flour of different molecular weights on viscosity of jejunal digesta in the pig **49**, 53A, 1990

Vitamin A deficiency
The interaction of vitamin A deficiency and rotavirus infection **49**, 67A, 1990

Vitamin B_{12}
Plasma methylmalonate and urocanate as indicators of defects in vitamin B_{12}-dependent metabolism in cobalt-deficient sheep
49, 150A, 1990

Vitamin D
Vitamin D and other extracellular factors in the control of growth **49**, 91–101, 1990

Vitamin E
Immune function in vitamin E-deficient rats
49, 30A, 1990
Vitamin E alters T cell subsets in elderly patients
49, 29A, 1990

Volatile fatty acids
Dietary-induced thermogenesis and feed evaluation in ruminants **49**, 227–237, 1990
Effect of hepatic portal infusion of propionate or equivalent saline loads on food intake in sheep
49, 221A, 1990

Wartime rationing
Rationing and wartime food policies in Iran
49, 46A, 1990

Weighed food intake
Weight changes during 7 d weighed energy intake studies in normal men **49**, 13A, 1990

Whole-body calorimetry
A non-invasive method for assessing muscle glycogen stores by whole-body calorimetry
49, 82A, 1990

Whole-body protein homeostasis
Whole-body protein homeostasis and protein requirements in man: validation studies of a new metabolic model **49**, 194A, 1990

Work performance
Effects of dietary supplementation on work performance in Gambian labourers
49, 44A, 1990

Yeast
The effects of yeast culture on yeast numbers and fermentation in the rumen of sheep
49, 47A, 1990

Yeast culture
Rumen probiosis: the effects of addition of yeast culture (viable yeast (*Saccharomyces cerevisiae*) plus growth medium) on duodenal protein flow in wether sheep **49**, 128A, 1990

Zinc
A critical assessment of leucocyte zinc as an index of Zn status in chronically ill hospitalized elderly patients **49**, 71A, 1990
Absorption of iron and zinc from human milk in suckling and weanling rats **49**, 70A, 1990
Absorption of iron and zinc from soya- and cow's milk-based infant formulae in sucking rats
49, 108A, 1990

Neutrophil zinc is related to the severity of hepatic damage in patients with liver disease **49,** 73A, 1990

The relationship between leucocyte and muscle zinc in surgical patients with and without gastrointestinal cancer **49,** 72A, 1990

Zinc in breast milk: a fractionation study, and comparison between communities **49,** 149A, 1990

Zinc deficiency

Plasma ^{65}Zn kinetics in zinc-deficient and endotoxin-treated rats **49,** 69A, 1990
